

**CENTRAL INTELLIGENCE AGENCY**

# INFORMATION REPORT

COUNTRY USSR (Uzbek SSR)

DATE DISTR. 11 Feb. 1952

**SUBJECT** Light Phenomena East of Tashkent

NO. OF PAGES 1

NO. OF ENCLS. 1  
(LISTED BELOW)

THIS IS UNEVALUATED INFORMATION

25X1

25X1 1. [redacted] three light phenomena happening  
at intervals of about 15 minutes were seen almost every night [redacted] 25X1

25X1 [redacted] The phenomena were watched from the PW camp in Pakhta Aral, about 50 km southwest of Tashkent (41°18'N/69°15'E), Uzbek S.S.R., in an east-southeasterly direction.

2. A darkred ball of fire was seen first; after about six seconds it reached the apex of a long-drawn out trajectory. During this time the ball had developed a trail of fire. Its color, which was bright red at the apex point, changed in color from pale green to white. Smoke trails, noises, or detonations were not noticed.
3. The distance of the trajectory from the point of observation was estimated at 60 to 80 km. \* The trajectory ran approximately from southwest to northeast; its length to the apex, which was from 5,000 to 12,000 meters high, was estimated at about 80 km. At the apex the ball of fire seemed about one-fifth the diameter of the full moon.

25X1 \*   Comment. The measurements stated with respect to the trajectory must be received with reserve. It must be considered that neither the discharge nor the noise developed by the projectile were heard. For trajectory of phenomena, see annex.

25X1   
1 Annex: One sketch showing trajectory.
